

Will the broadcast flag interfere with consumers ability to make copies of DTV content for their personal use, either on personal video recorders or removable media?

Broadcast Flag should ONLY be a gif not any prohibition of copying.

Would the digital flag interfere with consumers ability to send DTV content across networks, such as home digital networks connecting digital set top boxes, digital recorders, digital servers and digital display devices?

I use a set-top box and it is my ONLY access to the internet. Iight be prohibited from viewing!

Would the broadcast flag requirement limit consumers ability to use their existing electronic equipment (equipment not built to look for the flag) or make it difficult to use older components with new equipment that is compliant with the broadcast flag standard?

My equipment is OLD and I am POOR and cannot afford NEW equipment! This is a SCAM by provate companies to make me either pay for new equipment or Prohibit me from access which is unconstitutional!

Would a broadcast flag requirement limit the development of future equipment providing consumers with new options?

Kepp broadcasting FREE!

What will be the cost impact, if any, that a broadcast flag requirement would have on consumer electronics equipment?

I cannot afford to buy anything!
